

Patient name : KANG SENG
Date of exam : 26 mai. 24 08:55:13

Sex: M

Age: 63years

ULTRASOUND ABDOMINAL AND PELVIC

- **Liver:** Normal in size, regular contours, homogeneous echo structure. There is no evidence of a lesion within the liver parenchyma. The portal vein and hepatic veins are not dilated.
- **Gallbladder:** Mal visible.
- **Biliary tract:** Not dilated.
- **Pancreas:** Normal in shape with a homogeneous echo structure. The pancreatic duct is not dilated.
- **Spleen:** Normal in size and homogenous echo-structure.
- **Right kidney:** Normal in size, well-differentiated cortical pelvis zone. No evidence of kidney stone.
- **Left kidney:** Normal in size, well-differentiated cortical pelvis zone. there is evidence of micro hyperechoic foci in calyx.
- **Urinary bladder:** Moderately distended, with a thin regular wall without evidence of bladder stone.
- **Prostate:** Enlarge in size (Vol= 27.23ml), irregular contours, inhomogeneous echo structure with calcification.
- No evidence of adenomegaly intra-abdominal. The pouch of Douglas is free of fluid.

CONCLUSION:

- Hypertrophy prostatic.
- Left renal tiny stone.

Medical ultrasonography

Dr. NOP VANNARATH

ID	Name	DOB	Age	Sex
8922	KANG SENG	26/05/1961	063Y	M

Modality	Body Parts	Study Date	Description	Study ID	Accession No	Referring Physician
DX	Thorax Abdomen	26/05/2024 09:22:01	Abdomen PA	68239		

Findings

Scoliose convexité á gauche

Aérocolie et stase stercirales avec l'image hydroaérique plu l'haute qur large .

L'émoussement latérobasale gauche .

Impression

Eo sub occlusoin de grêle ,l'échographie Abd serait souhaitée .

Eo infection pleurale gauche .

Comments
